

Thank You to the Albertson's Foundation/Go On Grant from Homedale High School

The Seniors at Homedale High School have the Albertson's Foundation and the Go On grant to thank for providing funding for the Senior Project class instructor for the past two years. The class of 2014 pledged to Go On and as a result, 91% of this class intend to attend college, serve in the military or attend a technical school this fall. This is up from the Clearinghouse data which indicates that in previous classes barely 50% Go On to post-secondary opportunities. The senior project class made it possible for Homedale High School students to job shadow and explore career options in a way that changed the destiny of many of these students. Thousands of dollars in scholarship money was acquired by this class. Having two Gates Scholarship winners, is an outstanding achievement and one of the winners was a Go On ambassador representing the school at state sponsored events, Edmy Vega. We hope that we can keep this program going at Homedale High School into the future. The destiny of our students is at stake and we are hoping that a partner or many partners will come alongside to keep the dream alive at Homedale High School. Thank You for your amazing support!...from Debbie Flaming Homedale High School Counselor and Go On Coordinator 2012-13 & 2013-14

To whom it may concern at the Albertson's Foundation:

My name is Abigail Rice and I am a Homedale High School Senior. During the second semester Senior Project class my project consisted of a health fair for the seniors of my school. The ultimate goal was to educate college bound or future ready students about the importance of staying healthy after high school. I put in a total of nineteen hours into the project. The project was a success and the local newspaper, *The Owyhee Avalanche* wrote all about it. We were able to enforce learning, fun, and physical activity.

My mentor was Aundra Dewit, the Homedale School District school nurse. She came to our class and presented the idea of a health fair to us and I was immediately interested. Along the way she taught me the importance of schedule, organization, and documenting. I look up to her as a role model and was lucky to have a mentor who worked in the field that I desire to work in as well. I appreciate all the time she put into helping me with my senior project.

I now understand the crucial importance of a calendar and doing things in a certain order to make sure they get done. I understand that not everything goes as planned and that people do not always go through with what they say they will, so you should not be dependent on others. I think one of the most valuable skills I have learned is that if you want something done, then you have to do it yourself. I am more motivated because I have seen positive outcomes and I have developed a deeper understanding of failures and success. I know that even if something goes wrong or in a completely different direction that I will always learn something from it.

I plan on going to school in Idaho for at least a year to begin my degree in nursing but, I will further my education in the State of Washington. My ultimate goal is to get my Doctorate in nursing and specialize in Labor and Delivery.

Sincerely,
Abigail Rice

To whom it may concern at the
Albertson's Foundation:

Hello there, my name is Brenнын Kilby and I would like to express my appreciation to you for funding the senior project class. The class itself brought about a lot of stress in my senior year. However, during that stress I learned about a new field and obtained new skills.

For my project, I started my own floral business. I made up my own business plan, advertised my business, and executed in creating my arrangements. I sold corsages and boutonnieres to my fellow schoolmates. I ended up working 19 ½ hours over the course of my project. Often working after school and creating budgets. I ended up making about \$300 dollars in sales. Though, that was more than I expected.

This project taught me; in a small way that owning a business requires major multitasking. In the future, I would love to be a florist as a hobby. Possibly, after retirement. After High School, I plan on attending the University of Idaho to studying Journalism and Mass Media. I hope that the people skills I obtained during my project while conversing with customers will benefit me in my future career. Thank you so much for your contribution to the senior project class.

Sincerely, Brenнын Kilby

To whom it may concern at the Albertsons Foundation:

My name is Kayla Carson and I'm a senior at Homedale High School. For my senior project, I volunteered with Heart n' Home hospice. I had a total of 3 patients that I went over there to help with house stuff. This is going to help me with my Paramedic career because of the communication skills I earned. Thank you for helping us get this class.

Sincerely,

Kayla Carson

To whom it may concern at the Albertsons Foundation:

I am Luke Flaming a senior at Homedale High School. During first semester I had senior project. For my senior project I built a game website with weebly.com. It was a fun project and I really enjoyed seeing the students play the games.

My mentor was one of the teachers at Homedale High School he was the tech teacher his name was Mr. Grove. He was a lot of help because he had taught me earlier how to build a good website in one of my classes.

For my research paper I wrote about how newspapers will be replaced but websites. I learned a lot and I am glad I picked this topic. At the end of the paper I now have lots of evidence that newspaper will be gone in the near future.

I put in a total of 17 and half hours on my project. That was putting together the site, tweaking, adding, and updating the website daily.

After graduation I am going to Boise State University to study Marketing.

Sincerely, Luke Flaming

To whom it may concern at the Albertsons Foundation,

I am Oswaldo Gonzalez and I'm a senior at Homedale High School. I took senior project during my first semester of my senior year. My senior project was called "Job Shadowing a Police Officer". It took me 15 hours, which was the goal. My mentor was Mrs. Barbie Bander Bough and was the former administrator for Youth Court in Canyon County. I did my research paper on Law Enforcement, procedures, traffic stops, and safety of Law Enforcement officers.

I learned a whole lot job shadowing a Police officer in Homedale. I learned about patrol, different laws, citations and a little bit of jail/prison. It was a great experience! My future plans are to attend College of Western Idaho (CWI) and receive my Associate's degree in Criminal Justice and then transfer to Texas Tech University. After receiving my Bachelor's Degree I will then enlist in the United States Army. Thank you!

Sincerely,

Oswaldo Gonzalez

To whom it may concern at the Albertson Foundation,

My name is Emileen Noblit, and I am a senior at Homedale High School this year. During the second semester I was taking the Senior Project class. My name of my project was Genre Paintings. My mentor was Mrs. Belanger my art teacher. My Research Paper topic was how art affects our brains. How it connected to my project was that I painted 13 different paintings that was donated to the local public library. I spent forty-four hours on that project. What I learned was different art techniques. My future is going to College of Western Idaho as an undecided major.

Sincerely from,

Emileen Noblit

To whom it may concern at the Albertson's foundation,

My name is Larry Vega, I am a senior at Homedale High School. For my senior project I job shadowed Brett, at Rehab Authority across the street from the high school. My project was on learning about physical therapy and what it takes to become a physical therapist. My research paper was on what physical therapy is and what they do every day.

I put a total of 12 hours at job shadowing. I learned that to be a physical therapist, you have to take 8 years of college and get a doctorate. I plan on attending TVCC, and studying physical therapy. I had thought about it before, but when I job shadowed it made it even more likely that I would pursue that career.

Sincerely,

Larry Vega

Idaho, Idaho

To whom it may concern:

For the past four years I have been enrolled at Homedale High School and during my tenure I have grown into a fantastic young man that has been supported by a great staff. Homedale High is the only high school I would want to go to, and the students and staff are absolutely fantastic. During the second semester I had to take a senior project class and at first I was skeptical because I had heard things from past seniors that the class was hard and honestly I was not very excited. However as the year went on, I learned that the class is there to help us learn about responsibility and to prepare us for the future.

For my project I chose to rebuild the engine in a Kawasaki motorcycle that I will be riding when the warm months come. My mentor was my father's friend Jessie Davis, and I did my research paper on the topic of why owning a mechanics shop is a good investment. I put more than seventeen hours into my project, eclipsing the requirement of fifteen hours. I chose this project because I plan on going to college and taking a course on powersports and small engine mechanics. They offer this program at CWI and this actually works out perfectly because CWI is cheaper than other schools across the area and they still offer the program that I want.

I learned about how to be responsible and that if I put my mind towards something, I can get it accomplished no problem. Most people who know me will say that I am a lazy person and this is true, however when I need to get something done, I can get it done smoothly and without an issues.

In conclusion, the senior project class is a great class that teaches students how to be responsible and shows them that the real world is coming up and you won't be in the sheltered environment of high school forever.

Respectively,

Eric Mullins.

Dear Albertsons Foundation:

Thank you Albertsons Foundation for helping to fund our Senior project class. I have grown so much as an individual and have learned so much. It helped me to be a self-directed learner and to help others as well as myself.

I'm so excited to graduate and go on to college in the fall. I know that this will be a big step but the senior project class has really helped me to grow up and want to further my education. I know that anything is possible and that if I set goals I can make it happen.

Sincerely, Kylee Jenkins

To whom it may concern at the Albertson's Foundation:

My name is Mykal Hill and I am a senior at Homedale High School. I did my senior project in first semester. My project was based in the medical field. My mentor was Pediatric doctor, Dr. Brown from West Valley's Family Center in Caldwell, ID. I job shadowed him for eight hours as part of my project. I also talked to the second grade class in Homedale and encouraged them to create letters or cards to give to the pediatric patients at St. Luke's Hospital in Boise, ID. I made tie blankets as well, for the patients to deliver.

I used my senior project to help me decide which occupation I would like to go into. I have always wanted to become a Pediatrician ever since I was little. However, after job shadowing, I decided that I didn't like how little involved he was with the patients. I also would like to be more involved with the babies instead of children up to eighteen. Therefore, I have chosen to receive my Master's degree in Nursing and specialize in Neo Natal and Obstetrics Nursing.

I will be attending Idaho State University in the Fall of 2014 to begin my journey as a Nurse. I have also already received my CNA certification from Cossa Academy Professional Technical School.

Sincerely,

Mykal Hill

To Whom it may concern at the Albertsons foundation:

My name is Alissa Martin I am a Homedale High School senior, I took senior project class second semester this year .For my senior project I volunteered at the YMCA, My mentor was Erica, a trainer at the YMCA . Erica taught me how to do basic fitness test and she taught me what was expected of me as a volunteer. I spent 22 hours volunteering at the Y. This project made me realize what trainers do for a living and I discovered that it probably won't be something that I will do with the rest of my life but I am glad that I found that out now and I didn't go to school to be a trainer then found out that I didn't like it.

After high school I plan on attending CWI to take my prerequisites then I plan to transfer to a University.

Sincerely, Alissa Martin

To Whom It May Concern at the Albertson's Foundation:

My name is Maria Castro and I am a senior at Homedale High School. I am writing in regards of my senior project that I accomplished the first semester of this school year. For my project, I decided to run a coat drive to help those that are in need of warm clothing for the winter. The first things that I did were post flyers around the school and make announcements to the students in the school. I placed two bins near the front offices and had people donate their used, warm clothing into them. This project seemed very easy to begin with but in reality, it was very difficult for me to persuade people to actually donate. It took me a while to pick up clothing because many times the people that donated gave large amounts of it so I had to drive to their homes and pick them up. All in all, it took me exactly fifteen hours to complete this project. Since it was required to have a mentor for this project, I chose to work with Jim McMillan.

Throughout this project, I was very self-motivated and did not really ask him for help to organize it. In addition, I wrote a research paper titled, "No Roads Lead to Home." This research was gave an insight to how shelters make a difference to homeless people. This project not only gave me a challenge but also allowed me to learn and create new things about myself. I learned how to give responsibility and creativity of myself. Also, I learned how to organize a project on my own to raise community awareness. This class not only allowed me to finish my senior project but even gave me time to apply for scholarships and write scholarship essays. Mrs. Brumfield was a huge help for me to complete my college application process and of course, finish my senior project. Thank You for allowing me to take and learn in this classroom.

Sincerely,

Maria Castro

Albertsons Foundation

Thank you very much for making it possible for my Senior Class of 2014 at Homedale High School to take a Senior project class, rather than do all this independently. For my Senior Project I learned American Sign Language, and taught a class of 5th graders. They learned basic signs such as the alphabet, their names, the numbers, and common phrases like "Hello my name is..." I passed the class with an A and it has helped me to become for social with people, and more responsible.

Sincerely,

Lauren Craft

To whom it may concern at the Albertsons Foundation

I am Brenda S. Vega and I'm a senior at Homedale High School. During first semester Senior Project Class I did my senior project on job shadowing an Orthodontist. My mentor was Casey she worked at the orthodontic office I was going to. I enjoyed job shadowing because it showed and taught me more about this career that I plan to study once I go to college. My research paper was on how orthodontist gave patients confidence by having straight teeth. I was able to talk about people's experiences that braces have made them gain more confidence in themselves. My future plans are to go to college after I graduate high school and major in dental hygiene and then go to dental school out of state. I will be attending Idaho State University this fall. Then I would become an orthodontist once I finished with all my schooling. I have received FAFSA , the Gear Up Scholarship and a scholarship that was given to me at ISU.

Sincerely,

Brenda S. Vega

To Whom It May Concern At Albertson Foundation,

My name is Lane Sale and I am a senior at Homedale High School. During the Fall Semester I had my Senior Project Class with Mrs. Brumfield. For my project I put in a sound system in my sister's pickup. My mentor was Amy Freelove and she really helped me a lot with it. My research paper topic was how ohms affect watt current to different speakers. I worked on my project for about 25 hours and I learned a lot from all of it. I plan to go into the installation business and own my own sound company.

Sincerely,

Lane Sale

To whom it may concern at the Albertson's foundation:

I'm Jovan Cornejo a Homedale High School senior; during the course of the class I had the opportunity to take the senior project class during the first semester of the year. For my senior project I did this program called the Backpack Program I would go over to the Homedale Elementary and give children from pre-k to fourth. I would walk around the school during my senior project class and part of my lunch to give kids food for them to be able and have a little more food over the weekend and breaks. This really showed me how we don't know anyone's situation and what need they are in. These kids loved me and looked up to me, they called me their "super-man" that was the best part of my project. The fact that I got the opportunity to help kids in need for our own school and be a good Role model. I put over 13 hours into my senior project and I wish I could have done it from before really loved being with the kids and doing something like this. I pick this for my senior project because I wanted to do something nice and it seems like something nice to do I ended up loving what I did and getting to know some of the kids.

I am going to use this experience that I got from senior project into my real life career I want to become a police officer and I feel like this was a great leaning stretch for me. My mentor was a great help she guided me, taught me and trained me to help get the best possible experience out of my senior project also. I did my senior project paper on criminal justice just because I want to become a police officer and this helped me get to know more about the process. My future plans are to go to college and get a degree in criminal justice to become a police office.

Sincerely,

Jovan Cornejo

To whom it may concern at the Albertsons Foundation:

I am Stephanie Aguilera and I am a current senior at Homedale School District. During the second semester of school I started and completed my senior project with the help of my mentor Mrs. Garrett I was able to do some cosmetic sessions at the middle school for 5th and 6th grade girls. I chose my mentor because she is the counselor of both the elementary school and middle school. My research paper was called "A life Threatening Media" it was about how the media causes self-conscious images in teen girls, which I did emphasize throughout my project. The total hours I put forth in my project were 17hours total.

I learned a lot about organizing, planning, and I also realized how much I enjoyed teaching and I now plan to minor in education. My current plans are to GO ON to college at Idaho State University to become a Nurse and minor in education. I have also received the Gear-Up Scholarship and a local scholarship I am very excited about! Thank You for what you were able to provide for us it was a lot of help I couldn't have done it alone nether the less on my own time.

Sincerely,

Stephanie Aguilera

To whom it may concern at the Albertsons Foundation:

I am Jakelin Hurtado, a senior at Homedale High school. I had the senior project class my first semester. We did a lot of things in this class that really benefited me. We did a research paper in APA format that was new to me and could help me in the future. I thought it was really helpful; it helped me with applying to colleges, scholarships, and getting my FAFSA done. Doing my senior project really opened up my eyes. For my senior Project I did an anti-bullying presentation to all the 7th and 8th graders. I spent a total of 15 hours on this project by going to the middle school and presenting and also making some anti-bullying posters.

I learned a lot from doing this senior project and it definitely helped me get over my fear of public speaking. I was so happy with the outcomes that came from presenting; I inspired the 7th and 8th graders so much that they actually started an anti-bullying club there. I would have never expected for them to be so moved by my presentation that they would start a club but I'm happy they did because it is a real problem. I showed them a video that when I saw I could relate to and actually moved me so much to be nicer to people and talk to people about this issue. The video is by a guy named Shane Koyczan and it's called To This Day. I also did a power point where I explained all of the ways to spot, and stop bullying. I plan to go on to college after high school. I am accepted to attend Lewis-Clark State College in Lewiston. I got the gear up scholarship.

Thank you for taking the time to read this.

Sincerely,

Jakelin Hurtado

To whom it may concern in the Albertsons Foundation:

My name is Kyra Whitney, and I am a senior at Homedale High school this year. I took this class during the second semester. My project was a creative arts mural, with the help of my mentor, Mrs. Belanger. I did a research paper on how creative arts can help with Anxiety issues. Altogether I put in about 20 hours in my mural. I learned how much you have to time manage big projects, expect the unexpected and how hard it is to be put under pressure.

Sincerely,

Kyra Marie Whitney

To whom it may concern at the Albertsons Foundation

My name is Quincy Hall HHS Senior. I was in Senior Project class first semester this year. The name of my project was Magnificent Mural; I painted a mural for the old folk's home. My Mentor was Mrs. Belanger the art teacher here at Homedale High School.

The research paper I wrote for this class was called Street Art Up Rise and was about how Street art is not vandalism. We were required to have at least 15 hours of work put into the project I exceeded that limit and had 64 hours. I learned what types of brushes work best on certain types of walls and learned to plan better with the weather. After High School my plan is to go on to college up in Moscow and be a Vandal!

Sincerely, Quincey Hall

To whom it may concern,

My name is Brenda V. Vega and I am a currently a senior at Homedale High School. I did my senior project second semester on teaching others teens about a robotics programming. My mentor was Judith McShane and she works for the University of Idaho and is the coordinator of certain areas in Canyon County.

I did my research paper on all the types of robotics there are. The name of my research paper is Root of Robotics. I put 22 hours into my project. I learned to be well organized and have good communications skills. My future plans are to attend the University of Idaho. I want to pursue a degree in the Business field. I received the gear up scholarship. Although I did apply for more I didn't get any other ones. I thank the Albertson's foundation for giving us the students the opportunity to make improve our skills about responsibility.

Sincerely, Brenda Vega

To Whom It May Concern At Albertson Foundation,

My name is Riley Qualls I am a senior at Homedale High School. During the fall semester I had my Senior Project class with Mrs. Brumfield. My project was a football highlight film of our HHS team, my mentor was Tony Uranga, and my research paper was the importance of football film. I put a total of 72 hours into my entire project. My future plans are to attend Idaho State and study Sports Management.

Sincerely,

Riley Qualls

To whom it may concern at the Albertsons Foundation:

My name is Leslie Albor and I am from Homedale High School. During my second semester, I had senior project. For my senior project I job shadowed a Pediatrician. My senior project was titled Pediatrics. My mentor for my senior project was Dr. Hilary Warren who works at a clinic in Boise, Idaho. During my job shadowing experience I had the opportunity to learn more about a Pediatrician's daily life in their work field. I learned the type of patient's they deal with and what they are most seen for. During my senior project, I also had the opportunity to talk to my mentor. We talked about everything I needed in order to complete my senior project class. I told her that we had to write a paper that had to deal with our project. For my research paper, my topic was on language access in health care facilities. She told me more about the issue and how her clinic handles it; I also had the opportunity to see myself.

For our project we had to complete 15 hours, but I completed 20 hours. I really enjoyed my senior project. With my senior project, I was convinced that I wanted to become a Pediatrician. I became aware that I wanted to work with children and be involved in the Medical Field. For now, my future plans consist of attending Idaho State University, majoring in Pre-Medicine, and then going on to medical school to become a Pediatrician. I plan to be involved in the Peace Corps to get the opportunity to help those in need in other countries, which is something I have always wanted to do, and with your help I will be able to accomplish this. Some of the scholarships I have gotten thus far include the Gear-Up and CEA scholarships. These will help me accomplish my goals of becoming a Pediatrician and serving in the Peace Corps.

Thank you,

Leslie Albor

To Whom It may Concern: Albertson Foundation

I am Jace Turner, I am a senior at Homedale High School, and partook of a Senior Project Class. This class has helped prepare me for the future. For my project I job shadowed a job foreman who worked for Agri-Lines Irrigation. For his job he installed irrigation pivots, these are high tech and involve lots of wiring. He is the one that hooked all of them up. In total my entire senior project took is 20 hours. For my research paper that will help me go on to college, I talked about different kinds of irrigation and which one is best for the kind of crops and climates. In total I have learned tons in this class and it was very beneficial.

Thank You again for providing me and our class with this amazing opportunity to work alongside with some amazing mentors and have this workforce opportunity.

Jace Turner

To whom it may concern the Albertson's Foundation:

I am Stephanie Hurtado and I'm currently a senior at Homedale School District. During the first semester of school I did my senior project. My senior project was about leaving no child behind in a vehicle during hot weathers.

My mentor Kayla Haylett our librarian at the high school. My research paper was about ways on preventing leaving your child behind. It was a four minute video that showed how a quickly a mother forgets her child in the vehicle. I added 25 hours of my senior project. All from gathering the actors to editing the video. I've learned that not all parents that forget their children are irresponsible some just have a full plate. Also that a lot of people don't know what to do during a scene that a child in the vehicle.

My plans to continue my education at Idaho State University and major in dental hygiene. I didn't get a lot of scholarships I tried but I guess my effort wasn't enough. I only got the gear up scholarship and I plan on using it on my tuition.

Sincerely,

Stephanie Hurtado

To whom it may concern at the Albertsons Foundation:

I am Lizett Chavez and am currently a senior at Homedale High School. During my first semester of senior project, I had the opportunity to job shadow a registered nurse at West Valley Medical Center. The nurse, Mandy, was my mentor who guided me throughout her job and what her roles were in the medical field. I enjoyed looking at new things each time I went which totaled into twenty-six hours of knowledge. I learned things such as how to insert a Foley catheter and how to start an IV. I was also able to do some skills which included following and checking off hand hygiene of several certified nursing assistants. I got the chance to go onto different floors such as ortho, ICU, and peds. The research paper I did for my project was over euthanasia, which is the painless killing of a patient suffering from an incurable and painful disease. Throughout this experience, I realized that being a nurse is an ideal fit for me. I will be attending Lewis-Clark State College in the fall to major in nursing. I have received a few scholarships that will help to continue my education. I am excited for the future I have planned and hope to go far as I dream to be.

Sincerely,

Lizett Chavez

To whom it may concern at the Albertsons Foundation:

My name is Cheyenne Steinmetz and I am a senior at Homedale High School. I had my senior project class second semester. I organized a health fair for the seniors at my school and also job shadowed a House Supervisor for my project. My mentor was the school district nurse, Aundra Dewitt. I chose her to be my mentor because she was the leader of the health fair. We had to write a research paper. I wrote mine on Cystic Fibrosis. I chose to write about Cystic Fibrosis because my nursing class at COSSA was doing a fundraiser for the Cystic Fibrosis Foundation. At the end I completed thirty hours of work involving my project.

I learned a lot throughout the last couple of months. It taught me how to be organized, responsible, reliable, and how to be a self-directed leader. I was fortunate enough to be awarded the Gear Up Scholarship. I have applied for multiple other ones, but I have either not been awarded them or the winners won't be posted until June. My plans for the future are to attend the College of Western Idaho and study nursing. I will attend CWI for two years and then apply for the Nursing School at Boise State University. I'm thankful for this class and what it has taught me. It has made me more confident about the success I will have in the future. Thank you for your time.

Sincerely,

Cheyenne Steinmetz

To whom it may concern at the Albertson's foundation

My name is Elijah Gonzalez and for my senior project I was a tutor at the Homedale Elementary School for the after school program. I enjoyed my time at the project and the time I spent with the children I was able to tutor. After a while I realized that it was a privilege to work alongside the school staff. This project helped me explore my interests in the world of education. I think the senior project class was a very important part of my senior year because at the start of the year I had no idea of what I was going to do. Now I think I might consider going to school for a teachers degree or a tutor position.

Sincerely,

Elijah Gonzalez

To: Who it may concern at the Albertsons foundation,

Hello, my name is Christian Vega and I am a senior here in Homedale high school. During my 2nd semester 7th period Senior Project I decided to job shadow a veterinarian. I wrote a research paper about dogs. How they impact our lives. My mentors name is Rita. I didn't really finish my project because I didn't complete the fifteen hours we had to do. I've learned a couple moves when job shadowing like, calming a really hyper dog down. The key is ignorance. In the future I will be attending TVCC in Ontario, but don't know what to study yet but I have some ideas like architecture and maybe study for a vet.

Sincerely,

Christian Vega

To Whom it May Concern At Albertson Foundation,

My name is Tyson Levi Furlott. For my senior project I re stained and finished an old table that has been passed down through the family. My mentor was Mr. Greely because he is the woodshop teacher in the school; I worked a total of 16 hours on my project. My research paper was on endangered animals. I have truly learned to have patience threw the whole experience. My future plans are to go to TVCC in order to get my natural resources degree and transfer to E.O.U.

Sincerely,

Tyson Furlott

To whom it may concern at the Albertsons Foundation:

My name is Kody Dycus, a HHS senior. I took senior project class during the first semester of this year. The name of my project was "Box" which is a wooden box I made for my grandma. It connects to my future because I learned how to use tools that Ive never seen before. My mentor was a good family friend. I wrote my research paper about the United States Marine Corps and I put about 16 hours into my project. I learned that I could do anything that I put my mind to. I also learned the principles of wood working and how to make things out of wood. My future plans to "Go On" are to go to the College of Western Idaho to major in mechanics and hopefully minor in history.

Some details about my project is the box I made is for my grandma because she had a bunch of little things that had value to her just sitting around the house. So what I did was made a box that has hinges and a latch on it and could open up so she could put all of her stuff in it. I received a \$5,000 Pell grant from FAFSA. Thank you.

Sincerely,

Kody Dycus

To whom this may concern at the Albertsons Foundation,

I am Dylan Sharp and I am a senior at HHS. I took the senior project course first semester. My senior project was to build an Automotive Front End Trainer. Basically the trainer was built to show future students how front wheel drive systems work. This trainer next year will be used by COSSA academy for future students. It ended up taking me about 19 hours to complete, even though the minimum hours was 15 hours.

I did my research paper for the class on firefighting safety even though it has nothing to do with a front wheel drive trainer. Next year I will be going to CWI in Nampa to study criminology. I plan to eventually become a police officer after I am a guard in a jail or prison. Thank you for giving me the opportunity to learn the skills I need for the future!

Sincerely,

Dylan Sharp
